VACCINATIONS & IMMUNISATIONS

We are delighted to be able to bring Vaccination and Immunisation training to our member practices. Obtaining training for new starters and also annual updates for experienced clinicians has proved difficult for some of you recently. We have teamed up with an experienced trainer who receives excellent feedback from delegates and she will be providing a 2 day Introduction course for nurses and health care assistants in June as well as annual update courses. Please visit our [website](#) for current details.

ENHANCE YOUR TELEPHONE CONSULTATION & TRIAGE

We have teamed up with the very experienced trainers from EPI (who also deliver this training for Red Whale) to bring this relevant and informative course to all clinicians, from GPs to Pharmacists and Nurses at a significantly reduced cost. Recent studies show that around 20% of daytime primary care contacts with patients are on the telephone. This figure is rising, affecting us all. This course helps enhance relevant skills and manage clinical risks. Dates can be found on the [website](#).

SUPERVISING CLINICAL COLLEAGUES

Increases in the size of practices and changes in the workforce means that there is an increased need for clinicians to supervise other clinicians. For example, nurses supervising other nurses or healthcare assistants; GPs supervising salaried GPs, nurses and pharmacists. This may be done through formal supervision sessions but also on an informal day to day basis. This course is designed for primary care clinicians to enhance their skills in supervising colleagues. Dates are now available to book on the [website](#).

Why use YORLMC for your training needs?

Training is brought to you at a greatly discounted price compared to when receiving it from the trainers directly. We strive to bring the training to all localities so that it is easily accessible and reduces your time out of practice.

We sample all training personally so we are confident of its quality. We listen to your requests and will always try to source training where there is an unmet need.
